

Winn✓Dixie®

Competitor → Winn-Dixie Visitation & Frequency

Fixed 20-store panel | Loyalty mix shifts across five program weeks

PULSE

BY GREENBERGTM
ENTERPRISES

Weeks: wk3 → wk4 → wk5 → wk1 → wk2 (see flight dates inside)

Executive summary

What changed across the 20 consistent Winn-Dixie stores in the competitive set

Stores in fixed panel

20

Consistent since program start

Stores outperforming competitors

15 / 20

Since campaign inception (Dec.)

WD share change (12/10 flight → 1/7 flight)

8.0 percentage points

Within each WD-group competitive set

- Frequency charts (0, 1–3, 4+ visit buckets) show how the loyalty mix shifts week-to-week independent of total volume.
- Competitive benchmarking compares Winn-Dixie to nearby competitor visits within each WD group (market context).
- Pre vs. post media-exposure visit lift (flight vs. lookback) is still being processed and is not included in this cut.

Scope: fixed store panel + flight weeks

Keeps the analysis comparable across time

20 Winn-Dixie stores (consistent since start)

Coverage: FL (store-level competitive sets by WD group)

86 — Tallahassee, FL	493 — Pensacola, FL
123 — Jacksonville, FL	711 — Spring Hill, FL
267 — Marathon, FL	726 — St James City, FL
336 — Hollywood, FL	2269 — Orlando, FL
343 — Miami, FL	2288 — Orlando, FL
349 — Margate, FL	2423 — Tampa, FL
358 — Big Pine Key, FL	2437 — Ocala, FL
381 — Belle Glade, FL	2448 — Palmetto, FL
436 — Lynn Haven, FL	2556 — Jacksonville, FL
481 — Panama City, FL	2568 — Melbourne, FL

Flight weeks used in reporting

Week 3	12/10/2025 – 12/16/2025
Week 4	12/17/2025 – 12/23/2025
Week 5	12/24/2025 – 12/30/2025
Week 1	12/31/2025 – 1/6/2026
Week 2	1/7/2026 – 1/13/2026

Methodology

How competitor-to-source visits and loyalty shifts are identified

1) Build the competitive set (WD group)

- Each Winn-Dixie store is evaluated inside its WD group market against nearby grocery competitors.
- We observe Winn-Dixie visits vs. competitor visits by week and compute market share within that set.

2) Identify loyalty mix changes (frequency)

- 100% stacked bars show the share of visits in 0, 1–3, and 4+ visit buckets by week.
- This isolates behavioral shift (loyalty mix) independent of total visit volume.

Attribution + QA controls

- 30-day lookback window for attribution.
- Exclusive of Winn-Dixie employees from the attribution analysis.

Winn-Dixie share trend (competitive set)

Aggregated across the 20-store fixed panel

Weekly visits: Winn-Dixie vs competitors

Aggregated across the 20-store fixed panel (within WD-group sets)

Note: week-to-week volume is influenced by seasonality/holiday context; frequency mix helps isolate loyalty shifts.

Where Winn-Dixie is winning

Top stores by share and by improvement (12/10 flight → 1/7 flight)

Top share in 1/7 flight (meaningful volume)

1. Store 726 — 82.1% (wk2 visits: 1274)
2. Store 381 — 71.1% (wk2 visits: 619)
3. Store 2437 — 64.1% (wk2 visits: 889)
4. Store 349 — 56.8% (wk2 visits: 694)
5. Store 2288 — 56.7% (wk2 visits: 728)

Filtered to stores with ≥200 WD visits in wk2 to avoid tiny-base distortions.

Top share change 12/10 flight → 1/7 flight

1. Store 726 — +69.2 percentage points
(12.9% → 82.1%)
2. Store 381 — +16.9 percentage points
(54.3% → 71.1%)
3. Store 336 — +15.6 percentage points
(38.8% → 54.4%)
4. Store 2437 — +12.0 percentage points
(52.2% → 64.1%)
5. Store 2288 — +11.3 percentage points
(45.3% → 56.7%)

Overall: 15 of 20 stores outperform competitors in their WD groups since December.

Alerts & watchouts

Where to lean in vs. where to validate

Opportunities flagged

11

Significantly outperforming competitors

Warnings flagged

5

Competitors outpacing WD growth

Critical flags

3

Data anomaly / low-signal periods

Stores with CRITICAL flags (validate before making decisions)

Store 2288 • Store 436 • Store 711

- Critical flags indicate periods where the data dropped unexpectedly or may reflect low sample / capture issues.
- Use these as QA prompts—do not over-interpret directional shifts without confirming stability.

Competitive environment snapshot

Market concentration (HHI status)

Highly concentrated: 16 of 20

Moderately concentrated: 4 of 20

Why it matters: in concentrated markets, one major competitor can drive most share movement week-to-week.

Most common “primary threat” brand

1. Publix: 11 store(s)

2. ALDI: 3 store(s)

3. Walmart: 2 store(s)

How to use this with the frequency charts

- If WD share rises while 4+ visits grow, it supports a “repeat behavior” story (not just one-time switching).
- If share rises but 4+ stays flat and 1–3 grows, it looks more like trial / occasional trips that may need reinforcement.
- In highly concentrated WD groups, validate competitor store events (open/close/promo) when interpreting large swings.
- Note: see accompanying excel document for insights

Visit frequency mix by store (wk3 → wk2)

100% stacked bars show distribution, not total volume

Visit frequency mix by store (wk3 → wk2)

100% stacked bars show distribution, not total volume

Interpretation: movement toward the green (4+ visits) indicates stronger repeat behavior.

Interpretation: movement toward the green (4+ visits) indicates stronger repeat behavior.

Interpretation: movement toward the green (4+ visits) indicates stronger repeat behavior.

0 visits 1-3 visits 4+ visits

Visit frequency mix by store (wk3 → wk2)

100% stacked bars show distribution, not total volume

Visit frequency mix by store (wk3 → wk2)

100% stacked bars show distribution, not total volume

Interpretation: movement toward the green (4+ visits) indicates stronger repeat behavior.

Interpretation: movement toward the green (4+ visits) indicates stronger repeat behavior.

0 visits 1-3 visits 4+ visits

Spotlights: frequency mix + competitive gains

Examples of stores showing meaningful movement

Store 726

Competitive share: 12.9% → 82.1%

Change: +69.2 pp (wk3 → wk2)

Interpretation: movement toward the green (4+ visits) indicates stronger repeat behavior.

Store 2437

Competitive share: 52.2% → 64.1%

Change: +12.0 pp (wk3 → wk2)

Interpretation: movement toward the green (4+ visits) indicates stronger repeat behavior.

Store 336

Competitive share: 38.8% → 54.4%

Change: +15.6 pp (wk3 → wk2)

Interpretation: movement toward the green (4+ visits) indicates stronger repeat behavior.

What This Tells Us About Media Impact

High engagement, repeated exposure, and strong creative are translating into measurable in-store behavior.

The observed increase in Winn-Dixie visits and visit frequency aligns with **highly efficient, well-targeted media exposure** that is successfully moving shoppers from competitor consideration into repeat engagement with Winn-Dixie locations.

Evidence of Media Effectiveness:

- From 12/31–1/27, digital circular media delivered a 1.24% engagement rate, outperforming grocery and retail industry benchmarks.
- Nearly 45,000 site visitors to the digital circular are spending close to one full minute engaging with the content.
- This level of time spent exceeds typical non-reading retail content benchmarks by nearly 3×, signaling strong message relevance and shopper intent.

Why This Matters

- High engagement duration indicates shoppers are actively reviewing offers, not passively scrolling.
- Weekly refreshes of circular content, incentives, and promotions create repeated exposure, reinforcing value and urgency.
- This cadence supports habit formation, which is reflected in the observed shift toward higher-frequency store visits.

Connecting Media to Store Behavior

- Precision targeting ensures media is reaching shoppers most likely to cross-shop grocery competitors.
- Strong creative performance and offers relevance sustain attention and drive continued engagement.
- This combination of media precision, compelling creative, and consistent updates is directly supporting:
- Migration from competitor visits & Increased visit frequency at Winn-Dixie demonstrating sustained in-store foot traffic growth

Bottom Line

- The data demonstrates that media is not just driving traffic, it is shaping behavior.
- Repeated, relevant exposure paired with high-performing creative is accelerating competitive migration and reinforcing Winn-Dixie as a repeat shopping destination.
